A name you can build on.

SKYLIGHTS

LC

Tru-Frame® Curb Mounted Skylight. A simple yet elegant way to enhance the home environment. The introduction of additional natural light creates a brighter, more cheerful atmosphere and increases the value of a home. The Tru-Frame® Curb Mounted Skylight surpasses even the most demanding quality standards at a very reasonable price.

LO

Only Tru-Frame® could create a skylight like this! Designed to our demanding standards, these skylights are extremely versatile as well – allowing for a view to the outside both day and night while allowing fresh air in as desired. The skylight operates with the standard adjustable pole, but is available with an optional 24-volt DC motor that can be operated via a wall switch or a remote control. Tru-Frame® operable skylights are available in many sizes and in your choice of dome and frame color.

LCG

Designed to meet Tru-Frame®'s demanding quality standards, these skylights are extremely versatile – in both types of glass and frame configurations. They brighten any environment by allowing more natural light inside. And their low profile construction allows a great view of the world outside.

LOG

Tru-Frame® Operable Flat Glass Skylights bring the best of the outdoors inside. They are manufactured to meet the demanding climate that skylights incur while mounted on your roof. The sleek, low profile look of glass on your roof is a highlight to any home. Tru-Frame® skylights are available in many different glass options as well as the latest in energy efficient glazing. When you're looking for the ultimate natural light solution for your home, Tru-Frame® skylights are the answer.
